**Update of the CHM target oriented database with molecular
mechanism evaluations**

Document description	
Name of document	Update of the CHM target oriented database with molecular mechanism evaluations
Abstract	The online repository has been updated with molecular mechanisms of action and the evaluation of such relevant experimental data has been already included in the evaluation procedure (see D4.6) among the method section criteria and is partially included in the bonus criteria. Such contents can be seen on-line.
Document identifier	D4.10
Document class	Deliverable
Version	1
Author(s)	A. Buriani and P. J. Hylands
Date of creation	24 th January 2011
Date of last modification	7 th February 2011
Status	Final
Destination	European Commission
WP number	WP4

1 UPDATE OF THE CHM TARGET ORIENTED DATABASE WITH MOLECULAR MECHANISM EVALUATIONS

The online WP4 repository has been updated with molecular mechanisms of action and the evaluation of such relevant experimental data has been already included in the evaluation procedure (see D4.6) among the method section criteria and is partially included in the bonus criteria. Please visit the WP4 repository at <http://www.gp-tcm.org/wp-chm-database/> to view the current database as detailed above.
